MATERIÁL

MATERIAL

ZÁPADNÍ ČERVENÝ CEDR
WESTERN RED CEDAR (WRC)

Výjimečný materiál k jehož vynikajícím vlastnostem patří vysoká stabilita, odolnost proti hnilobě, typická vůně thujaplicantů - fenolických pryskyřic, díky kterým je vůně vysoce antiseptická. Dřevo indiánů, stromy staré více nežli 300 let, používané na stavbu kanoí a totemů. Struktura dřeva není sukátá, má striktně rovnoletá vlákna. Ve svém přirozeném neošetřeném stavu má nádhernou strukturu kombinovanou s paletou teplých měkkých tónů, od lehkého jantaru až po tmavomedovou hnědou.

Is a material with unique characteristics, above all high stability, decay resistance and typical agreeable smell of „thujaplicants“ - phenol resin, which makes the smell highly antiseptic. Western Red Cedar trees, which are more than 300 years old, were used by Indians for canoes and totems production. This wood perfectly keeps its size stability. This wood is enormously beautiful and without knots - it only has straight fibers. This species of wood has a lot of warm colors - from light amber to dark brown.
